

**About Us::**

Right since its inception 1993, Autonix Auto Industries (P) Ltd. (AIPL) has established itself as a pioneering leader in the manufacture of stainless steel and special metal based components which have extensive application in cars and mobikes.

The AIPL's modern manufacturing facility at Noida near Delhi has the capacity to produce 10 million components per month.

These components fashioned meticulously out of stainless steel and brass (with Nickel plated surface), are critical components in Automobile such as

- New generation automotive Halogen lamps
- Motor bike body parts.

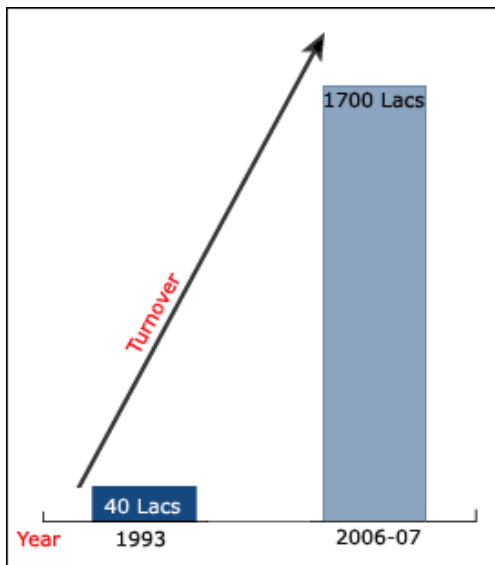

The facility has full fledged Press & Molding Division, Rolling Mill Division, Welding Division (SIM, Butt, Projection welding and spot welding), and Surface Treatment Division. The production is ably backed by the in-house Tool Room and a stringent quality control cell.

The range of Stainless Steel Wheel Rims and other body parts for bikes produced by the company has established its reputation in the OE and replacement markets.

**Our Vision::**

"At Autonix (AIPL), we constantly push the boundaries of innovation. Our unwavering commitment to moving technology forward has transformed in our products we produce

We're a company that's always in motion, fueling an industry that never rests. We inspire to develop quality products that drive industry standards. We do this so that we can collectively deliver better solutions with greater benefits more quickly"

**Quality Policy::**

**Quality Policy::**

We at Autonix Auto Industries Pvt Ltd. are committed to provide consistent Quality products to our customers worldwide.

For the achievement of world class Quality in the products manufactured, It is necessary that every employee is involved in ensuring and improving Quality Of products at all times.

The Management On Its Part Is Fully Committed To Quality And Provides All Resources To Accomplish This Task.

**Quality Systems::**

As OE supplier to reputed companies, AIPL has established itself as a trusted source of world class components.

At Autonix, Quality Control is inherent at every stage of the production process. Every lot of S/S or brass raw material is subject to rigorous tests for tensile strength, elongation, cupping value, draw ability and bend strength. Our Quality control experts ensure only the best materials go on to make the finished product which means critical specifications are conformed to without and compromise.

**ISO 9001:2000 certified::**
